Green Power

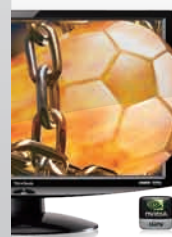

The ViewSonic PC mini 132's Intel® Atom® 330 dual-core processor and nVIDIA® ION® chipset provide smooth operation and swift response for your daily Internet, word processing and media enjoyment needs, the graphics-intensive games run attractively as well. Thanks to its low voltage, low heat and extremely low-noise design, you save on electricity bills and our environment saved from excessive carbon.

Windows 7 the new generation

The ViewSonic PC mini 132 is coupled with innovative Windows 7, a system with reasonable hardware requirement and smooth operation comparing to Windows Vista, along with stable performance and a dazzling yet familiar interface. Your learning curve is flat and effortless – open the box, hook up the lines and you are ready to go.

Full-speed, HD graphics

The ViewSonic PC mini 132 boasts the latest nVIDIA® ION® chipset incorporating a GeForce 9300 graphics processor. The graphic performance of the ION chipset can be 10 times faster than the Intel GMA945 chipset employed by budget PCs and laptops. With full support to DirectX 10 and 1080p high-definition video from the HDMI interface, the GeForce 9300 is capable of playing HDTV content without overloading the central processor.

Be there without being there

The Nvidia ION chipset of ViewSonic PC mini 132 has the artistic talent to deal with your professional-class audio gears. Its S/PDIF optical sound interface supports up to 7.1 stereo channels for you to enjoy movies, music and even immersive game plays with the unparalleled "being there" sensation.

5-in-1 memory card reader

The ViewSonic PC mini 132 has a 5-in-1 memory card reader compatible with SD, SDHC, MS, MS Pro and MMC cards from your digital camera or other devices. So you no longer need external card readers or cables that take up USB ports.
